

# Index to Volume 5

- AARONS, J. H., *see* SAX, S. M.  
 AARONSON, S., *see* BAKER, H.  
 Absence of serum albumin associated with rheumatoid arthritis: Shetlar, M. R., Shetlar, C. L., Payne, R. W., Stidworthy, G., and Mock, D., 377  
 ACKERMAN, J. A., A rapid screening method for the elimination of cross contamination in the determination of protein-bound iodine, 615  
 ACKERMANN, P. G., Blood lipids in young and old individuals, 100  
 ADAMS, P. A., *see* CLAYTON, M. M.  
 Adaptation of an alkaline phosphatase method for automatic colorimetric analysis: Marsh, W. H., Fingerhut, B., and Kirsch, E., 119  
 Adaptation of micro methods to the Coleman Jr. spectrophotometer: Caraway, W. T., 371  
 Albumin, 377  
 Amino acids, 186, 368  
 Amylase, 263, 372, 592  
 Androgens, (book review), 633  
 Annual Meeting, Eleventh, Scientific program, 356  
 APPLETON, H. D., The rapid determination of calcium in biologic material, 36  
 APPLETON, H. D., A survey procedure for blood urea nitrogen, 266  
 APPLETON, H. D., Studies of blood lipid fractions of quiescent rheumatic fever patients and their siblings, 558  
 Application of fluorometry to chemical analysis: Udenfriend, S., 367  
 Application of x-ray spectroscopy to the clinical laboratory, I. Calcium and potassium: Natelson, S., Sheid, B., Richelson, M. R., and Bender, S. L., 260  
 ARENSBURGER, K. E., A modified method for determination of uropepsin, 135  
 Assay of thiamine in biologic fluids: Baker, H., Pasher, I., Frank, O., Hutner, S. H., Aaronson, S., and Sobotka, H., 13  
 AUSTIN, E., *see* HOLLINGER, N. F.  
 Automatic chromatographic analysis for amino acids using the autoanalyzer: Ferrari, A., and Macduff, G. H., 368  
 Automatic titration of calcium or magnesium in blood serum: Malmstadt, H. V. and Hadjiioannou, T. P., 50  
 Azotaurobilirubin, 533  
 Azobilirubin, 533  
 Azure A, urine, 115  
 Bacteriophages, (book review) 632  
 BAKER, H., Assay of thiamine in biologic fluids, 13  
 BAKER, H., A microbiologic method for detecting folic acid deficiency in man, 275

# Contents

## NO. 1, FEBRUARY

Serum Iron and Iron-Binding Capacity in Clinical Diagnosis	<i>Emanuel E. Mandel</i>	1
Assay of Thiamine in Biologic Fluids	<i>Herman Baker, I. Pasher, O. Frank, S. H. Hutner, S. Aaronson, and Harry Sobotka</i>	13
Urinary 17-Ketosteroids in Various Endocrine Disorders	<i>A. A. Zakharycheva</i>	18
The Rapid Determination of Calcium in Biologic Material	<i>Harold D. Appleton, Marcia West, Mary Mandel, and Angelo M. Sala</i>	36
Determination of Magnesium and Calcium in Urine	<i>Raul Carubelli, William O. Smith and James F. Hammarsten</i>	45
Automatic Titration of Calcium or Magnesium in Blood Serum	<i>H. V. Malmstadt and T. P. Hadjiioannou</i>	50
Micro Determination of Glutamic Oxalacetic Transaminase in Blood Serum	<i>Freya Hermann, Martha H. Brookes, and Clara A. Storvick</i>	57
A System of Clinical Chemical Analysis	<i>Bernard Klein</i>	62
The Clinical Chemist		71
Abstracts		75

## NO. 2, APRIL

Hypoglycemic Agents—Past and Present	<i>Israel S. Kleiner</i>	79
Blood Lipids in Young and Old Individuals	<i>P. G. Ackermann, G. Toro, J. Toro, T. Kheim, and W. B. Kountz</i>	100
The Standardization of the Van Den Bergh Reaction for Serum Bilirubin	<i>Robert E. Carter and Charles J. McGann</i>	106
Quantitative Determination of Azure A in Urine	<i>Bernard Klein and Milton Weissman</i>	115
Adaptation of an Alkaline Phosphatase Method for Automatic Colorimetric Analysis	<i>Walton H. Marsh, Benjamin Fingerhut, and Elaine Kirsch</i>	119
A Modification of the Spectrophotometric Determination of Carbon Monoxide in Blood Enabling Direct Determination of Per Cent Hemoglobin Saturation	<i>Hans Berninger and Roger Smith</i>	127
A Modified Method for Determination of Uropepsin	<i>Konstantin E. Arensburger</i>	135
The Determination of Inulin in Blood and in Urine by Means of Vanillin in Acid Medium	<i>Victor E. Levine and William W. Becker</i>	142
Staining Properties of Oil Red O and a Method of Partial Purification of the Commercial Product	<i>Henn Kutt and Theodore T. Tsaltas</i>	149
Book Review		161
The Clinical Chemist		162
Abstracts		168

## NO. 3, JUNE

Studies on the Serum Proteins: IV. The Dye-Binding of Purified Serum Proteins Separated by Continuous-Flow Electrophoresis	<i>F. William Sunderman, Jr. and F. William Sunderman</i>	171
Disorders of Amino Acid Metabolism in Protein Deficiencies and Their Correction	<i>S. Ya. Kaplansky</i>	186
Studies on the Photometric Determination of Phenylpyruvic Acid in Urine	<i>Abraham Saifer and Alfred Harris</i>	203
Current Views on the Process of Urea Formation in Animals	<i>T. T. Berezov</i>	218
The Determination of Catechol Amines in Blood	<i>Mary P. Keenan, William P. Kleitsch, and Fred L. Hummoller</i>	239
The Clinical Chemist		248
Abstracts		260

M1  
13

## NO. 4, AUGUST

A Microbiologic Method for Detecting Folic Acid Deficiency in Man <i>Herman Baker, V. Herbert, O. Frank, I. Pasher, S. H. Hutner, L. R. Wasserman, and Harry Sobotka</i>	275
Note on Standardization Curves for Gamma Globulin Determinations <i>J. Fraenkel-Conrat</i>	281
Determination of Chloride in Blood Serum, Plasma, or Other Biologic Fluids by a New Rapid Precision Method <i>H. V. Malmstadt and J. D. Winefordner</i>	284
Symposium on Quality Control in Clinical Chemistry <i>Lloyd A. Knowler</i>	297
Statistics in Clinical Chemistry <i>Spencer M. Free, Jr.</i>	300
Use of the Control Chart in Clinical Chemistry <i>Richard J. Henry</i>	309
A System of Microchemistry for the Hospital Laboratory Designed for Maintenance of a High Standard of Performance <i>David Seligson</i>	320
Vitamin B <sub>12</sub> (Cobalamin) <i>V. A. Trufanov</i>	335
The Clinical Chemist	349
Eleventh Annual Meeting American Association of Clinical Chemists: Information and Program	355
Eleventh Annual Meeting: Abstracts of Scientific Sessions	366
Abstracts	382

## NO. 5, OCTOBER

Quantitative Determination of Tryptophan Metabolites <i>D. Coppini, C. A. Benassi, and M. Montorsi</i>	391
Variation of pH of Clinical Samples as a Source of Error in Enzyme Determinations <i>Richard J. Henry and Neil Chiamori</i>	402
An Improved Test for Phenylketonuria <i>Chauncey O. Rupe and Alfred H. Free</i>	405
A Practical Method for the Determination of Fibrinogen <i>Miriam Reiner and Helen L. Cheung</i>	414
The Spectrophotometric Determination of the Oxygen Saturation of Blood <i>George W. Johnston, Freddy Holtkamp, and John R. Eve</i>	421
Micro Methods for the Determination of Chylomicron Counts, Fatty Esters, Lipid Phosphorus, and Cholesterol in Blood Serum <i>Mary M. Clayton, Patricia A. Adams, Gisela B. Mahoney, Shirley W. Randall, and Eleanor T. Schwartz</i>	426
Prevention of Cross-Contamination in the Dry-Ash Method for PBI: A Note <i>Julius K. Lugovoy</i>	445
A Discontinuous Buffer System for Paper Electrophoresis of Human Hemoglobins <i>C. A. J. Goldberg</i>	446
Some Laboratory Aids for a Clinical Laboratory <i>Hiram H. Schepers and Robert G. Martinek</i>	452
Studies of Cholesterol Methodology <i>Nell F. Hollinger, Elizabeth Austin, Dorothy Chandler, and Richard K. Lansing</i>	458
Concentration of Hyaluronic Acid in Synovial Fluid <i>Barry Decker, Warren F. McGuckin, Bernard F. McKenzie, and Charles H. Slocumb</i>	465
Studies on the Use of the van dan Bergh Reagent <i>Samuel Meites and Cecelia K. Hogg</i>	470
Elimination of Interfering Chromogens in the Zimmerman Reaction for Measuring 17-Ketosteroids <i>Arnold G. Ware, James A. Demetriou, Solomon Notrica, Ronald Searcy, Clifford Walberg, and Fred Coz</i>	479
Determination of Carbonate in Biologic Solids <i>Robert F. Sharp, James S. Elliot, and Leon Lewis</i>	488
Electrical Modifications of the Baird Flame Photometer <i>Robert C. MacDuffee</i>	492
Book Review	496

Clinical Chemist	497
Abstracts	504
Letter to the Editor	508

## NO. 6, DECEMBER

Measurement of Isocitric Dehydrogenase Activity in Body Fluids	<i>George N. Bowers, Jr.</i>	509
X-ray Spectroscopy in the Clinical Laboratory: I. Calcium and Potassium	<i>Samuel Natelson, Morton R. Richelson, Bertrum Sheid, and Stephen L. Bender</i>	519
Spectrophotometric Behavior of Azobilirubin and Azotaurbilirubin	<i>M. Jirsa and V. Jirsava</i>	532
Glucose Determination by Automatic Chemical Analysis	<i>Harold J. Grady and Martha A. Lamar</i>	542
A Volumetric Method for Serum Sodium	<i>Peter Oesper and Carl J. Pauerstein</i>	551
Studies of Blood Lipid Fractions of Quiescent Rheumatic Fever Patients and Their Siblings	<i>Harold D. Appleton, Alvin F. Coburn, and Yale L. Meltzer</i>	557
A Modification of the Method for Prestaining Alpha and Beta Lipoproteins Separated by Paper Electrophoresis	<i>Bernard J. Larkey and John S. Belko</i>	566
A Procedure for the Determination of Cerebrospinal Fluid Total Protein and Gamma Globulin in Neurologic Disorders	<i>N. M. Papadopoulos, W. C. Hess, D. O'Doherty, and J. E. McLane</i>	569
Spectrophotometric Studies of the Zimmermann Reaction	<i>Howard S. Friedman</i>	575
A Note on the Determination and Identification of Cyanide in Biologic Materials	<i>S. L. Tompsett</i>	587
Improved Spectrophotometric Determination of Amylase with a New Stable Starch Substrate Solution	<i>Eugene W. Rice</i>	592
A Method for the Routine Determination of Chlorpropamide in Plasma	<i>Ralph H. Carmichael</i>	597
Procedures for Testing Urine Specimens Dried on Filter Paper	<i>Helen K. Berry</i>	603
Rapid Semimicro Procedure for Estimating Free and Total Cholesterol	<i>Armand J. Courchaine, William H. Miller, and Donald B. Stein, Jr.</i>	609
A Rapid Screening Method for the Elimination of Cross-Contamination in the Determination of Protein-Bound Iodine	<i>John A. Ackerman and John T. Myers</i>	615
A Simple Method for the Determination of Blood Urea Nitrogen, with Special Reference to Automatic Colorimetric Analysis	<i>Helmut J. Richter and Yvette S. Lapointe</i>	617
Erratum		621
A Simplified Procedure for the Routine Determination of Uric Acid	<i>Mohinder P. Sambhi and Arthur Grollman</i>	623
Book Reviews		634
The Clinical Chemist		636
Abstracts		648
Index		653
